Spring fever is starting – the days are longer and the sun seems brighter and all the children are going stir crazy. Cooped up for the winter months, all thoughts are turning to the playground.

The playground is the best place in the world to find a way to look at the world upside down. When you look at the world through your child's eyes so many things are opened up to new possibilities. Do you remember when touching your toes and looking through your own legs was your most favorite way to pretend: how

about climbing on the monkey bars hooking your legs on a bar and just swinging without your hands holding on.

The playground opened up new worlds of sights and sounds, new friends and especially total independence to have fun. So adults, where do you go to get all those things, have you been anywhere recently that filled you with a new sound, sight, touch etc that brought out the wonderment of the universe? Can it be that we have seen it all? So here is this months exercise –

Look around, how does the world look from this position? Believe in the things you still have yet to learn and experience.

Go seeking new visions, new smells, new ideas - spark that new imagination. Your child will have a great time showing you their world for a change. If you hang upside down on a regular basis, than kudos to you for your upside down imagination: You are the upside down visionary. We would love to hear your story write to us. www.ccthedots.com

New definitions of some old Terms II

Achievement: Successful completion of a goal , task activity or feeling of satisfaction.

Behavior: Actions, reactions and interactions. Actions and habits that reveal feelings, ideas and impulses. Actions that can be enforced with cognitively correct® guidance.

Childhood: The time or period of life that classifies the early years and stages of development, learning and growth. The human qualities of innocence, pure thought and palpable ability to absorb new information rapidly with a profound a propensity for retaining it. The growth stages of certain developments that must be addressed with particular requisites for appropriate cognitive development. The time of preschool

development when a Child's job is to play and learn through play.

Imagination: The keeper of all possibilities. The temple of innovations. The reliable, loyal and dedicated defender of all hopes and dreams. The zone of unlimited feelings and thoughts that are protected and free from all trespassers.

Highlighted School – NJ & NYC

Central Early Childhood Center
1447 Delsea Drive
Deptford, NJ 08096
Tel: 856-384-8750
Contact: Rena Alpert

Twice a school year the Deptford school district closes their doors for their teacher training days. We were lucky enough this year to be one of the participants.

We were welcomed with open arms, the preschool teachers of Deptford had been longing for the cognitively correct® system of communication (CCSC) for over 15 years. We, of course, were very happy to oblige.

The teachers at the Central Early

Childhood Center, totally and completely understood the way of communicating in a cognitively correct® way as well as completely understood the importance in using the CCSC 100% of the time when talking with young children.

These women were passionately engaging when talking about how to integrate the CCSC into their classrooms. We will be seeing more of them.

4 Angels Day Care, Inc.
245 Simonson Avenue
Staten Island, NY 10303
718-876-6498
Sandra Greatheart

We at Cognitively Correct, Inc.

feel completely confident in recommending the teachers at the 4 Angel Day Care Center to anyone interested in having their children taught by cognitively correct® teachers. These young teachers after just a 1 ½ hour naptime special really understood the concepts and practices of the (CCSC) Cognitively Correct® System of Communication.

Though the experience level of these teachers was considerably less in actual years the understanding of the group was very impressive.

Thank you for your cognition to all our attendees.

See your school here!

We can all think and feel alike based on our universal desires for love and happiness, but we can be independent thinkers and feelers based on our unique talents and aptitudes. By C.A. Woolf

Peace will guide the Planets and your house too!

MARCH HOROSCOPES 2008 By Vikki Anderson

*Choose the sign which correlates to your child's birthday. The sun sign represents one's inner core belief system, habits and thought patterns. Being a Leap Year, the horoscope dates have changed a day before or after the normal horoscope dates. The child's actual birth date and year should be taken into consideration if the birthday is on the cusp (the change from one sign to the next). An ephemeris or natal chart can be done to determine the child's actual sign. If there is a question, contact Vikki Anderson at Starscape50@aol.com with your child's actual birth date and year and she will reply with your child's actual sun sign. Please put **Sun Sign Request** in the subject line.*

Aries ♈ **March 20 – April 18**

Arian children seem to be under a lot of stress this month, so let them do what they need to do to express it and get through this trying period. Mothers, women educators and friends are going to be the most influential people in these children's life this month. It would be best if these children have calmness and clarity in their surroundings or environment. Let him/her know exactly what is required of him/her and answer their questions even if they seem trivial to you. Be sure to correct situations with positive reinforcement. Sometimes children need to make mistakes to learn from them and then you can show them a "better" way they may be able to handle similar situations in the future without letting them think they were incorrect. This is an extremely sensitive time, so being very matter of fact with rules would work best. Tell them stories to ignite creativity; they will use their imagination to dissolve any challenges that lay before them and it would be a welcomed release and escape.

Taurus ♉ **April 19 - May 19**

Taurean children seem much more aloof than usual, but they need this time to think in a very logical and analytical way, even if you have difficulties understanding what they are doing or why. They are thinking very independently, a wonderful opportunity for a young mind to investigate and discover. Taureans are charismatic and can charm the socks off of anyone when they want something, so be aware that his/her friendly smile and cute disposition may have a motive. Encourage friendships that bring diversity of artistic talents to this child. He/she needs to be mentally challenged and praised for all of his/her hard work. They may need time to play alone or with just a few selected friends, so be more flexible about them joining a group if it is unnecessary. They must find their own cohesive bonds with other children.

Peace will guide... (cont)

Gemini ♊ **May 20 – June 19**

Geminis are running around expending energy and are seemingly quite scattered. There is an actual method to this scattered energy that only a few of us would understand. The excess energy needs to be used in a constructive project or on the playground where it can be worn down a bit. It may also seem as if there are ADD tendencies but this is just a time when there is too much information and activities surrounding them at once and they are trying to accomplish everything. School life and home need to be consistent. Change is important, so let them try a few new things. They want to accomplish and do everything and although that is a wonderful thing, some guidance is appropriate so that their energy stays constant. This little Gem wants to rule the roost this month and although one wants to support this leadership tendency, some mild rules or boundaries should be set into place.

Cancer ♋ **June 20 – July 21**

These very soft and emotional children seem much more sensitive than normal this month. They are also more family oriented and should be encouraged to do more things in the home, with siblings and parents. This child needs much more affection, attention and love now. Cancerians crave nurturing energy from caregivers and parents, but also gives it to their stuffed toys, pets and family. This sign would do well to be in a quiet atmosphere where they could explore their imaginations. Crayons, pencils and lots of paper (rather than coloring books) should be available for this child if he/she has the inclination to draw or color. Put these drawings up on the refrigerator and you will have a new collection of artwork every day! Cancerians may need a little more attention and should have restrictions lessened for them to feel secure and stable. Partnerships of all kinds should be encouraged.

Leo ♌ **July 22 – August 21**

Raising a Leo child can be an arduous task if handled improperly. However, if you make your Leo child think that he/she is in charge, you've got it made. Siblings and class mates are important to them now even though they need to lead them to make them feel as if they are in control. Learning practical lessons on how to behave within school or home may be essential now. Make sure any issues with siblings or school are handled quickly. Talk to this child frequently about things you feel are important to him or her. Although, this child will always express him or herself, the issue is that these children are extremely sensitive on the inside even though the exterior seems confident. Be ready to be empathetic and compassionate. Brothers and sisters cause restrictions to this child – they need to feel important in some way to feel secure and loved. This child bucks at orders, so it would be in both of your best interests if you say, "I need your help in cleaning your room," etc. Let them make up their own mind within your boundaries and things will run much more smoothly.

Virgo ♍ **August 22 – September 21**

Be sure this little Virgo has a good breakfast, healthy snacks and lots of liquids. He/she needs to have good eating habits this month to maintain appropriate health. This is a well grounded month for Virgos. They feel safe and secure, but may be rebelling against certain lessons or restrictions now. Perhaps they just have difficulties understanding what they are supposed to learn or what is expected of them. Careful communication and spelling things out precisely in an organized fashion would work well. School is going to be a safe haven for them as they are little sponges and want to soak up books, lessons and information. There seems to be some annoyances around them, so assure them that you can handle anything once you know what the issue is. Adults need to be much more compassionate and sensitive to their needs. If you present lessons, homework, play time more easily, make sure it is well planned, focused and structured.

Libra ♎ **September 22 – October 21**

What a creative month for little Librans. This child has great artistic talents in art, writing and singing. If you open up the world of art to them or if they show an interest or inclination, you would be helping these children to creatively express themselves. This sign is also interested in fashion for the girls and law, policemen or police cars for boys. Things need to be kept light hearted this month and well thought-out. This sign's attention span will be better if there are just a few things going on simultaneously. Their attention is caught by a million different things. Their active imaginations may include some invisible friends who are positively real to them. Be supportive of their stories and new friends. Friendships will be made and kept for many years while other complicated or mismatched relationships will start to dissipate. This Libran may need your help in making positive choices or decisions, but only give them your opinion and let them make the final decision. Librans tend to have problems with decisions and procrastinate with too much information, so guide them into future good habits.

Scorpio ♏ **October 22 – November 20**

There are so many wonderful opportunities for growth for this little Scorpio this month. His/her hard work and attention to detail will pay off and he/she will be very happy with the work or projects accomplished, especially if he/she were allowed to do the whole thing by him or herself. Any obstacles or challenges that you see should be eliminated early so that this child can excel in all that he/she is willing to try and accomplish. What a great month to try new things, have new experiences and find a little more confidence in him or herself by their undertakings. Encouragement and constant kudos are in order to help this child reach his/her potential to succeed. This sensitive sign needs to know that they are appreciated and loved no matter what the circumstance.

Peace will guide... Conclusion

Sagittarius ♐ **November 21 – December 20**

These Sagittarius children will seem very detached this month. They will be clowning around, may be disruptive and have too much excess energy. This is a time when they will try to live by their own rules and want you to understand that their rules are better than yours. Many will say exactly what they think and feel as the filtering process in currently under developed, so being very understanding and forgiving is a must. They are adventurous, spirited and will display a great deal of inventiveness and originality, all positive traits that should be carefully fostered. Try to encourage this resourceful spirit by allowing him/her to explore his/her talents. Playing by the rules is very important to them, even if it is their rules. They like working within a framework, even though you may get a different feeling from them.

Capricorn ♑ **December 21 – January 19**

These industrious Capricorns will do well to conform to the set standards and rules this month. He/she may be too insistent on doing things their own way and if the situation allows it, it would be in everyone's best interest to let them have their way, especially on trivial matters. If it is inappropriate behavior, then firm rules must be set. He/she will be work oriented and very seriously trying to accomplish whichever task which is laid before them. The need for a calmer environment with few distractions in one's surroundings, school and friends would bring about a more contented child. This child seems to be getting bored easily. He/she will be industrious and will work hard to get the task completed to everyone's satisfaction, although they secretly wish you would be thrilled with their work as well. Both of your diligence and hard work will pay off. Your attention to detail will help this Capricorn understand order, boundaries, limits and the need for teamwork. There is a bright future for this child if you let him/her expand and grow into the direction he/she needs.

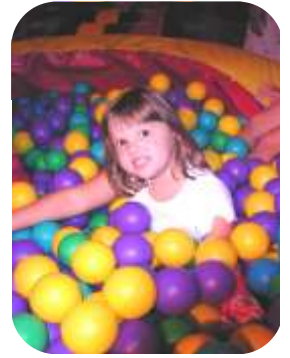

Aquarius ♒ **January 20 – February 18**

What an amazing and active imagination this little Aquarian has this month. He/she is artistic and is willing to explore these tendencies under the right circumstances. It would be in the child's best interest if you remove anything or anyone that you feel is stifling his/her need to know, grow or act. Try to give him/her their space this will increase their creative process. This child needs solitude for their very active imaginations. You may have difficulties understanding what this child is planning or doing much of his or her life, but be assured, their ideas are about fifty years ahead of everyone else's. Let them gain their independence while staying in the background within reach. They are thinking outside of the box. He/she needs space, and has to find his/her own way. These children will always be interested in fairytales, folklore, stories from foreign countries or foreigners. They are intrigued by so many things so ignite their inventiveness and vision for the future.

Pisces ♓ **February 19 – March 18**

School is the grounding place for Pisceans this month. Artistic endeavors will be explored and should be nurtured. This is a very helpful child whether in the home or at school. He/she is always giving a helping hand although with little repayment for his/her kindness, so an extra kind word or acknowledgement of their good deed would go a long way. Their teamwork and cooperation will have profound influence on other children. These children will know how to compromise; they wish to please. Pisceans do have a strong sense of self (even though they may be shy on the outside). There is contradictory energy around them this month. He/she would like to be alone and then want to be part of a team or group. You should go with the flow with this child because they may be unsure what they truly need or want right now and are looking for answers.

Guilt is simply the relinquished ownership of our own feelings, thoughts, and abilities that we inadvertently have allowed someone else to own because supposedly the "knew better."
By C.A. Woolf

New on the Horizon

Since January we have been announcing new arrivals that will all be emerging on the scene in the future. Well I would like to announce we will be adding a community forum to the website.

By the time this newsletter reaches you the community will be established. We here at Cognitively Correct, Inc. would like you to have the support every individual who has dealings with young children need.

We understand the burdens of taking care of and nurturing

young children in a cognitively correct world and we are changing what we can.

First we need to support you and your preschoolers (whether they be parental or educational care) with a community of like minded individuals all understanding the importance of the cognitively correct® system of communication (ccsc) and all that entails.

Second we invite you to ask a question from the preschoolers' guru™ in this forum. We will be posting daily topics open for discussion.

All questions and answers will be posted for the community to benefit from unless expressly requested.

We invite you now to sign-up at www.ccthedots.com on the left you will find the sub navigation button and follow the directions on the site.

So remember invite your friends and or colleagues to join. The more the community has new questions the better we can all interact with our future.

www.ccthedots.com

If you expect children to learn "responsibility" then you must be willing to allow them to 'respond to their abilities.'

Calling all reviews:

To our readers:

Thank you for your subscription to our newsletter, as a show of appreciation to you and your family we would like to offer you the chance to get your questions answered about your particular home life.

Please e-mail your question to guru@ccthedots.com and in the subject line please say question for the Preschoolers' Guru™.

We will reply through the e-mail as well.

Thank you again!

Whether you have read the book, attended a seminar, or just explored the website. We would like to hear from you. We are looking to expand our comments section as well as start off the community forum on a good note. We would like to hear from you!!!

Here is a few suggestions of how to reach out to us.

What are you looking for from us?

What can we help you with?

What do you think of Cognitively Correct, Inc. to date?

We are very serious about hearing from you. The first 25 responses to our plea will receive a 25% off coupon for any of our products current and future.

E-mail us at: bryce@ccthedots.com

Put reviews in the subject line and we will be sending you the coupon. Every e-mail will be read with care and attention, all comments will be reviewed to possibly appear on our website under the endorsement section. If you would care to keep your comments private please state that at the end of your e-mail.

Thank you for your time and support. C.A. Woolf
